

D6 – Contribution Report (Part 2)

Recipix v4.1 – CSE 341 Semester Project (joint)

Berk Hakan Öge (210104004132) İsmail Kabak (1901042652)

23 May 2026

1. Per-deliverable ownership

The table below lists every Part 2 section / component and the partner who owned it. The reviewer column names the partner who read and sanity-checked that section before final submission. Where two partners contributed substantively to a single section, both names appear.

D1 – Design Specification (joint PDF).

Section	Owner	Reviewer
§4.1 Language Overview	İsmail	Berk
§4.2 Lexical Structure	İsmail	Berk
§4.3 Syntax (EBNF)	Berk	İsmail
§4.4 Semantics (<code>scale</code> , <code>foreach</code>)	Berk	İsmail
§4.5 Type System	İsmail	Berk
§4.6 Names / Binding / Scope / Lifetime	İsmail	Berk
§4.7 Expressions & Assignment	Berk	İsmail
§4.8 Design Rationale (split)	both	both

D2 – Implementation (joint zip).

Component	Owner	Reviewer
<code>src/lexer.py</code>	İsmail (P1)	Berk
<code>src/recipix/parser.py</code>	Berk (P1)	İsmail
<code>src/recipix/ast_nodes.py</code>	Berk (P1)	İsmail
<code>src/recipix/tokens.py</code> (contract)	joint	joint
<code>src/recipix/environment.py</code>	joint	joint
<code>src/recipix/runtime_values.py</code>	joint	joint
<code>src/recipix/errors.py</code>	joint	joint
<code>src/recipix/typechecker.py</code>	İsmail	Berk
<code>src/recipix/interpreter.py</code>	Berk	İsmail
<code>src/recipix/rendering.py</code>	Berk	İsmail
<code>src/recipix/__main__.py</code> (CLI)	joint	joint
<code>src/tests/test_parser.py</code> (48 tests)	Berk (P1)	İsmail
<code>src/tests/test_interpreter.py</code> (36+)	Berk	İsmail
<code>src/tests/test_regression.py</code> (harness)	joint	joint
<code>src/tests/regression/ fixtures</code>	joint	joint
README, build / run instructions	joint	joint

D3 – Test Report (joint PDF).

Program / section	Owner	Reviewer
§1 Overview	joint	joint
§2 Sample 1 (Pancakes) + discussion	Berk	İsmail
§3 Sample 2 (Smoothie) + discussion	Berk	İsmail
§4 Sample 3 (type error) + trace + discussion	İsmail	Berk
§5 Parse-error fixtures table	joint (P1 carryover)	joint
§6 Summary	joint	joint
LaTeX assembly	joint	joint

2. Workload split

The division for Part 2 followed the natural module split from the joint Part-2 plan: *Berk = interpreter + rendering + Part-1 parser carryover*, *İsmail = type checker + Part-1 lexer carryover*, with the cross-cutting shared modules (`environment.py`, `runtime_values.py`, `errors.py`) and the runtime contract drafted and reviewed jointly per plan §2.5 / §2.6.

The workload is split **evenly (approximately 50/50)** between the two partners. Berk’s main artefacts – the ~700-line interpreter, the rendering layer, the recursive-descent parser carried over from Part 1, and the 36-test interpreter suite – are matched on İsmail’s side by the ~700-line type checker (all 19 spec §10 errors implemented, including the `captured_params` re-execution rule for `scale`), the hand-written lexer carried over from Part 1, and the late-cycle bug-fix round that resolved several integration issues uncovered by the PM review. Both partners contributed to the shared infrastructure and to all five written deliverables.

Each partner’s contribution is comfortably above the 40% threshold the handout requires.

Submitted 23 May 2026 as the joint D6 deliverable for the Recipix Part 2 submission. Companion documents: D1 (design spec), D2 (interpreter source zip), D3 (test report), and the two individual D4 / D5 PDFs per partner.
